Introduction

This is where page numbering restarts at 1. Marking this heading `{ .unnumbered }` keeps it out of chapter numbering — it still appears in the Table of Contents and still lands on page 1, it just doesn't consume "Chapter 1." The next real chapter heading after this one becomes Chapter 1. (If you'd rather have the Introduction itself be Chapter 1 — some books do it that way — just remove `{ .unnumbered }` from the heading above.)

Chapter 1

Governance Fundamentals

Regular portrait-mode content goes here — write normally, exactly as you did in Typora. Plain headings, lists, bold/italic, images, and narrow tables all work with no special syntax.

Here is a normal narrow table (fine in portrait). These definitions align with the foundational framework in Smith & Jones (2021).

Core risk terminology

Table 1.1: Definitions referenced throughout this book.

Term	Definition
Asset	Something of value
Risk	Potential for loss

1.1 Example: wide table in landscape with header, first-column, and row shading

When a table has many columns and needs more horizontal room, wrap it in a landscape block. Only this table's page rotates — everything before and after stays portrait.

Pandoc's auto-generated tables (from Markdown pipe syntax) can't shade just the header row or just one column — only whole-row zebra striping via `\rowcolors`. For that level of control, write the table directly in raw LaTeX instead, using `\cellcolor` per cell (it overrides whatever `\rowcolor` set for that row). The header/ first-column colors below are the brand-defined `giTable...` colors from `preamble.tex`, with a hairline `giTableDivider` rule between rows instead of alternating-row shading — combining zebra striping *and* rules on the same table tends to look busy/competing; picking one is cleaner. (Zebra striping is still available via `\rowcolor` if you'd rather have it back instead of the dividers — just swap which one runs between the data rows below.)

The control register methodology follows Jones & Smith (2022).

Sample requirements register

Table 1.2: Sample requirements register, mapped to evidence type and review frequency.

Control ID	Domain	Requirement	Evidence Type	Frequency	Owner	Risk Level	Status
REQ-001	Governance	Board reviews policy annually	Meeting minutes	Annual	Owner A	High	Active
REQ-002	Access	MFA enforced on all admin accounts	Config export	Continuous	Owner B	High	Active
REQ-003	Data	Data classified per policy	Classification log	Quarterly	Owner C	Medium	Active
REQ-004	Incident	IR plan tested	Test report	Annual	Owner D	High	Active

Portrait content resumes right after the landscape table. Tables labeled `tbl-*` are cross-referenceable elsewhere in the text — for example, Table 1.1 and Table 1.2 above resolve automatically to “Table 2.1” / “Table 2.2” and stay correct even if the tables get reordered or renumbered later.

Table headers (the bold line right above a table, like “Sample requirements register” above) are just an ordinary bold paragraph — no special syntax needed, works the same for both Markdown and raw-LaTeX tables. *Captions* need raw LaTeX either way: Pandoc’s native Markdown table caption syntax (a : line after the table) always renders the caption **above** the table, with no way to move it — that’s hardcoded in Pandoc’s template, not something this project’s styling controls. To get a caption below the table (as both tables on this page do), write the table as raw LaTeX and place `\caption{}\label{}` near the end, right before `\end{longtable}` — and make sure the table is **not** wrapped in `\def\LTcapttype{none}` (that’s Pandoc’s own convention for suppressing numbering on *uncaptioned* tables; a captioned table needs it removed, or the caption won’t number or show up in the List of Tables). Citations don’t resolve inside a raw LaTeX block (Quarto’s citation processor only sees actual Markdown text), so keep any `@citekey` in the surrounding prose rather than inside the `\caption{}` text itself.

Chapter 2

Structural Literacy

Second chapter content goes here.

Figures work with plain Markdown image syntax — no raw LaTeX needed (unlike captioned tables). Caption placement below the image is Pandoc’s normal default here, no override required the way tables needed one.

Figure 2.1: Placeholder logo, used throughout this book’s title page.

As with tables, a `fig-` prefixed label makes a figure cross-referenceable — Figure 2.1 above resolves automatically to “Figure 3.1” and stays correct if figures get added or reordered.

To force a page break within a chapter (not needed between chapters — that happens automatically), use:

Content after the break starts on a fresh page.

References

Citations anywhere in this book — like Smith & Jones (2021) or (Jones & Smith, 2022) — pull from `references.bib` and resolve automatically. Use `@key` for an inline citation (“as Smith and Jones (2021) explain...”) or `[@key]` for a parenthetical one (“...is well established (Smith & Jones, 2021)”). Multiple keys in one bracket (`[@key1; @key2]`) combine into a single citation.

The actual reference list prints below — Quarto inserts it wherever this `refs` div appears, so it’s under your control the same way the Table of Contents and List of Tables are (rather than trusting Quarto’s default of appending it to the very end of the document).

Jones, A. B., & Smith, J. M. (2022). Article Title. *Journal Title*, 13(52), 123–456. <https://doi.org/10.1038/s41586-021-03616-x>

Smith, J. M., & Jones, A. B. (2021). *Book Title* (7th ed.). Publisher.

About Your Organization

Captioned images work fine here — this logo is a real, working example. It’s excluded from the List of Figures automatically (see `preamble.tex`’s “LIST OF FIGURES / LIST OF TABLES — CHAPTERS ONLY” section for how); nothing special needed in this file itself.

Figure 2.2: Your organization’s logo.

A short paragraph about your organization goes here — mission, background, what you do.

Add your organization’s bio copy here — mission, accreditation notes, program history, whatever belongs on this page.

Thank You

Thank you for reading. We hope this book serves you well.

Add closing notes, contact details, or next-step guidance here.
